

April, 2018

Dear Friends,

We are so delighted to be the beneficiary of the funds from the **Phoenix Restoration**. This is a huge milestone and we are so grateful that they have chosen to support Kids Cancer Care. By supporting our Foundation you are helping rekindle joy in the hearts of children at camp, making life saving research and treatments possible and empowering cancer survivors to live their dreams through scholarships and supportive education programs.

We need your help. By contributing to Kids Cancer Care, you are gifting parents and families the opportunity to watch their children who are affected by cancer smile, laugh and play. Please consider supporting the Phoenix Restoration by donation or consider one of their many sponsorship opportunities. Cancer is the number one cause of death in children from six months to young adulthood. This year alone, 160 families in Alberta will learn their child has cancer. Today, because of advances in research, the survival rate for childhood cancer is close to 80 per cent, but many live with lifelong side effects and we still see too many families who lose a child. Did you know that during difficult economic times such as these, our program numbers increase exponentially? We need your help now more than ever!

With your help, Kids Cancer Care will continue to enhance the quality of life for children living with cancer, improve their odds for recovery and provide care for the whole family, during treatment and beyond.

We could not do what we do without the support of our community partners and people like you.

Warmest regards,

Kelsey Morrison-Fischer
